My American Representative :

Messrs RALPH M. WARD & Co., Murraystreet, 71, NEW YORK.

To my American and English Friends and Patrons !

In presenting this little Guide through my Establishment and Cultures, I beg to thank you for your liberal Patronage in the past, and I flatter myself that the activity, combined with a long experience in our line of business will secure me the same confidence I have hitherto enjoyed.

Visitors to Ghent should not fail to visit my Establishment and Cultures.

My Stock of Palms, Azaleas, Araucarias, Bay Trees etc. is one of the largest and most complete in all commercial sizes and varieties and I produce only healthy, clean and strong Plants.

My continual visits of all the Belgian Floral Establishments enable me to know the minutest Details of the Quality, Quantity and Market Prices existing in Belgium, **and I control most of the choicest Stock of the smaller Growers, who have not the facilities of Packing and Exporting to America.**

My Sales are limited to the Wholesale Trade, and I quote at Wholesale Growers Prices only.

All of my Shipments pass my personal Examination and my long Experience and Reputation will be upheld by continued carefulness, and giving **good value and satisfaction** to my friends and Patrons.

Soliciting your valued orders, I am

Yours very respectfully,

C. PETRICK.

Azalea mollis is a native of Japan and undoubtedly one of our most beautiful shrubs for forcing or planting in groups or borders in Parks or Gardens. The flowers are larger and of more perfect form than those of the *A. pontica* variety, and resemble in form and size those of the Indian Azaleas. Their gorgeous colors vary from yellowish white, rose, all shades of yellow to the richest orange.

Hybrid Azalea Mollis.

Azalea mollis hybrida.

A new and distinct hybrid of hardy Azaleas. Their flowers are larger than those of Azaleas mollis. The period of flowering is between that of Azalea mollis and pontica.

Their hardiness, vigorous growth, fine habit, luxuriant foliage and profusion of attractive flowers, render them one of the most beautiful of flowering shrubs in cultivation.
